

Context

Our dental clinics provided a total of 846 free dental services in December 2019, with the number of clinics decreasing to only 4, after the violent offensive launched on Idlib Governorate since the 21st of this month, which led to a large displacement situation, targeting of health centers, and many civilian and humanitarian casualties.

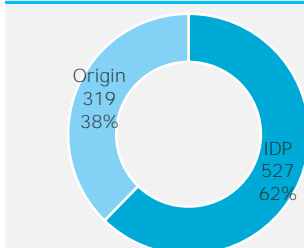

Awareness sessions were provided to 20 children, through community health workers in displacement camps, accompanied with the distribution of oral hygiene kits and after providing the necessary instructions to prevent tooth decay and maintain oral and dental health.
